Message id 1:

When Admin Approves the transaction, the message needs to be sent to the customer about the payment received and the work initiation.

Select message_content from **loandocx_message_notifications**
Where message_id = 1;

Next, to send a message to the customer's mobile number, have to fetch the Processing fees and mobile_number **from loandocx_customers_loan_details** table.

In the approval screen, already details are fetched from the **loan_docx_customers_loan_details** table, so make use of those column values to send the message, don't duplicate the sql query.

For message code 1. The message sent was fetched from the table, which looks like below

Your payment of Rs **<Processing fees>** received for Legal and property valuation.

In this message, replace the <processing fees> with the processing fees value. When you sent the message to the customer, the message looked like below

Your payment of Rs 10000 received for Legal and property valuation.

Message ID 2:

When the Civil user updates as the job is completed, then check if Legal work is completed or not. If not, then send the message

To send a message to the customer's mobile number, have to fetch the mobile_number **from the loandocx_customers_loan_details** table.

In the Civil job submit screen, the details are fetched from the **loan_docx_customers_loan_details and LoandocX_Transactions** tables, so make use of those column values to send the message, don't duplicate the sql query.

If legal_head_job_completion_date is null then

Select message_content from **loandocx_message_notifications**
Where message_id = 2;

Else

Select message_content from **loandocx_message_notifications**
Where message_id = 4;

End if;

Send the message_content as it is to the customer.

Message ID 3:

When the Legal Head updates as the job is completed, then check if the Civil work is completed or not. If not completed, then send the message

To send a message to the customer's mobile number, have to fetch the

mobile_number **from the loandocx_customers_loan_details** table.

In the Legal Head job completion screen, the details are fetched from the **loan_docx_customers_loan_details and LoandocX_Transactions** tables, so make use of those column values to send the message, don't duplicate the sql query.

If civil_team_job_completion_date is null then

Select message_content from **loandocx_message_notifications**
Where message_id = 3;

Else

Select message_content from **loandocx_message_notifications**
Where message_id = 4;

End if;

Send the message_content as it is to the customer.

Message id 5:

When the Agent submits a customer's loan application.
Tran id will be generated. This message needs to be sent to all Admin users

Select message_content from **loandocx_message_notifications**

Where message_id = 5;

Fetch the mobile_number of all admin users from **loandocx_user_profile**

Select mobile_number from **loandocx_user_profile**
Where user_type = ‘AD’ and user_active = ‘Y’;

For message_id = 5 the below is the message content

New Transaction <Tran id> generated. Review and approve the transaction

Replace the **<Tran id>** with the actual generated tran id value
And send this message to all Admin users.

Message id 6:

When Admin approves the transaction and allocates the Legal user and Civil user. Then this message needs to be sent to both Legal and Civil users.

Select message_content from **loandocx_message_notifications**
Where message_id = 6;

Fetch the mobile_number of allocated legal_user and civil_user from **loandocx_user_profile**

Select mobile_number from **loandocx_user_profile**
Where user_id in (:allocated.legaluserid ,:allocated.civiluserid)

For message_id = 6 the below is the message content

Job allocated. Refer <Tran id> for details. Please complete the work as soon as possible

Replace the **<Tran id>** with the tran id value
And send this message to the allocated Legal and civil user

Message id 7:

When the Legal user submits the work as completed, then the message needs to be sent to the Legal head

Select message_content from **loandocx_message_notifications**
Where message_id = 7;

Fetch the mobile_number of allocated legal_head_user from **loandocx_user_profile**

Select mobile_number from **loandocx_user_profile**
Where user_id = :Allocated.legalheaduser

For message_id = 7, the message content is given below

Job allocated. Refer <Tran id> for details. Please complete the work as soon as possible

Replace the **<Tran id>** with the tran id value
And send this message to the allocated Legal Head user.
