CERES GLOBAL ENTERPRISES PROFILE

CERES Global Enterprises

Chennai-based agriculture support and consulting organization working closely with farmers, livestock owners, farmer groups, MSMEs, and institutions to improve farm incomes and strengthen market access. We help design and implement practical agriculture projects that are financially viable, scalable, and sustainable, using a combination of field knowledge, digital tools, and strong market connections.

CERES identifies suitable locations and develops collection and storage points where farm and livestock produce can be aggregated and moved efficiently to markets. Through careful assessment of local demand, production levels, and ground conditions, we help reduce transportation costs, prevent post-harvest losses, and ensure timely sales.

We support farmers and producer groups in finding buyers, converting enquiries into confirmed sales, and receiving payments directly, ensuring transparency, faster settlements, and better price realization. Our systems help track quantities, prices, and payments clearly so producers always know the status of their sales.

CERES also assists entrepreneurs, farmer groups, and agribusinesses in accessing bank loans and institutional funding. We prepare Detailed Project Reports (DPRs) and required technical and financial documents for banks, NABARD, and investors, helping projects secure timely approvals and funding.

To improve efficiency and accountability, we use simple automation, AI-based planning tools, and ERP systems to manage records, forecasts, inventory, and payments. These digital tools help reduce errors, improve planning, and bring greater transparency across the value chain.

Supply of fodder, straw, and seeds is provided where required as part of broader project support and market linkage activities. By combining field-level understanding, digital systems, financial guidance, and market access, CERES Global Enterprises works as a reliable partner in strengthening agricultural livelihoods and supporting inclusive rural development.

Our Service

DPR Preparation (Banks, NABARD, Investors)

Experts Reports for banks,NABARD and investors to secure funding

Farm Automation and Agri-tech Integration

Implement IoT, auto-irrigation, ERP systems for efficiency

Commodity Trading Support

Guidance on trading fodder ,seeds abnd biomass.

Market Linkage & Supply Chain Consulting

Connect producers with buyers and streamline Logisitics

Agri Project setup and Management

End-to-End support for Fodder farms, Dairy units, Poultry,mushroom units

Agri Real Estate – Land Sourcing

* Agricultural lands for Sale / Long-term Lease
* Land suitability (soil, water, access & compliance)
* Complete due diligence support

Allied Agriculture & Animal Husbandry Lands

* Dairy Farming
* Goat & Sheep Rearing
* Poultry Projects
* Fishery & Aquaculture

Contract Farming & Cluster Development

* Land aggregation for contract farming
* Farmer onboarding & cluster formation
* Structured agreements with institutional buyers

Modern & Scientific Farming Solutions

* Scientific & Precision Farming
* Hydroponics
* Vertical Farming
* Polyhouse / Greenhouse Cultivation
* Technology & productivity optimization

Large-Volume Agri Produce Supply Enablement

* Bulk crop & land planning
* Supply support for:
* Ethanol & Bio-energy Plants
* CPG / FMCG Companies
* Food Processing & Export Units
* Demand-based crop planning with off-take
* assurance

Renewable Energy Advisory

* Site assessment and resource potential analysis
* Technology selection and system design advisory
*Regulatory approvals, policy guidance, and compliance support

Our Mission

Driving sustainable agriculture and clean energy for a greener future.

Our Projects

Farmer SaaS Platform (Uber-Model)

We operate a digital marketplace that connects every farming stakeholder in one ecosystem. Farmers,Transplanter operators,Nursery centres,Seed suppliers,Tray suppliers,Labour groups Logistics partners.
This mobile-first platform simplifies booking, tracking, and managing all farm-relate operations.

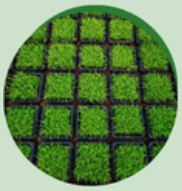

Poultry Farming Digital Solutions

We support poultry farmers with a simple mobile system to manage Flock details,Mortality logs,Feed consumption records,Medication,Inventory,Billing an logistics. This helps poultry farmers make data-driven decisions and increase profitability.

SEED TO HARVEST

FARMER SaaS PLATFORM We offer a mobile-first SaaS platform that connects every stakeholder in the farming ecosystem. We specialize in end-to-end agricultural solutions, enabling farmers to move from seed selection to harvest with efficiency and precision.

NURSERY

Paddy tray nurseries facilitate uniform seedling growth, ensuring healthy plants for transplanting.

TRANSPLANTING

Mechanized transplanting enhances efficiency, ensuring precise seedling placement for optimal growth and yield.

MONITORING

"Once planting is complete, the health check process begins: crops are frequently monitored, and fields are fertilized via drone services

HARVESTING

The mature paddy crops are harvested using modern machinery, maximizing productivity and reducing labor costs.

Chicks to Meat

A cross-platform mobile-first app focusses to help small-to-medium poultry to manage flocks, daily logs, Health checks and tracking the logistics.

Brooding Stage

Chicks are kept warm with controlled temperatures and high-quality feed.

Monitoring Health

Regular health checks and vaccinations ensure the well-being of the birds.

Grow-Out Phase

Birds are raised in controlled sheds with balanced feed for optimal growth.

Logistics

Mature birds are transported under controlled conditions to licensed slaughterhouses ensuring safety and compliance.

Our Products

Green Fodder
CO-4 Napier Grass; CO-5 Napier Grass
Available: Fresh-cut, Chopped, Bulk Loads

Dry Fodder (Paddy Straw)
Compressed bales only — 25 to 30 kg per bale Clean, moisture-controlled, ideal for storage & transport

Fodder Seeds
Hedge Lucerne; COFS-29; COFS-31; African Tall Maize Certified, high-germination lots

Paddy Nursery
Our paddy nursery seedlings are healthy, uniform, faster growth and higher yield ready for easy transplanting and we provide nursery for customized rice varieties.

Paddy Trays
High-quality paddy nursery trays designed for fast, uniform seed germination. Durable, reusable, and perfect for modern rice farming.
